## Overview

---

Grow your network with the Aruba [J9995A](#) HPE 5400R z12 Switch Series Module. This module offers an 8-port 1/2.5/5/10GBASE-T PoE+ features, allowing different speed options. It's made to work with the HPE 5400R z12 Switch Series, providing secure connections. It uses MACsec encryption for data protection. This module supports Power over Ethernet (PoE+), making it easy to power and connect network devices like IP cameras, phones, and access points through one cable. Weighing light at 2.05 lb and measuring a space-saving 10.3 x 8.13 x 1.75 inches, it's sturdy and saves space. It's perfect for large businesses and home use, offering speed, security, and versatility in one compact device.

### Why the Aruba J9995A HPE 5400R z12 Switch Module is perfect for Your Network?

The Aruba HPE 5400R switch module has some cool features. These are as follows:

- For one, it supports 1/2.5/5/10GBASE-T speeds. This gives your network plenty of options to connect.
- This easy little module also uses PoE+ tech, so powering up devices like IP cameras and phones in your network becomes easier.
- Are you worried about security? The module has you covered there, too. Its MACsec encryption keeps your data safe across your network.

Its compact design effortlessly blends into your existing HPE 5400R z12 Switch Series setup, making it a perfect match for those who want to boost their network safely.

### Which Devices Work with the Aruba HPE 5400R Module?

This module pairs well with the HPE 5400R z12 Switch Series, boosting connection possibilities.

### Can the Aruba HPE 5400R Module Handle PoE+?

Yes, it can. The Aruba J9995A can handle Power over Ethernet Plus (PoE+). This feature makes device installations easier, merging power and data onto a single cable.
