Overview

The JPSU-600-AC-AFO is a high performing and rack mountable power supply unit for many applications. The importance of the feature includes that; it offers steady power output. The JPSU-600-AC-AFO is designed with grace and is compact making it perfect for environments where space is a limitation. Offering low noise production and high efficiency; this power supply unit is ideal for use in delicate circuits. It has output voltage and current options on the JPSU-600-AC-AFO to cover a range of loads.

Model	JPSU-600-AC-AFO
Product Type	Power supply - redundant
Form Factor	Plug-in module
Power Supply Compatibility	Network hardware
Power Provided	600 watt
Power Device Features	Front to rear airflow
Interfaces	1 x console RJ-45 management, 24 x 1000Base-T RJ-45, 4 x 10Gbit LAN SFP+

They also include an overvoltage and over current protector to protect all the devices when connected to the socket. The unit also features a cooling fan to ensure that the device does not overheat especially when put in use for extended periods of time. First, the JPSU-600-AC-AFO is very simple to install and operate, which is good news for both experts and budding users. It is the ideal power supply to help you power up lab equipment, audio equipment or any computer peripheral you may require. JPSU-600-AC-AFO is designed for an efficient action and is one of the best power supply units that can be bought today.
